

Smart Campus Solution

Mission

Wi-Fiber's Mobile Edge Compute (MEC) Platform can autonomously inter-operate multiple technologies in real-time; supplementing legacy safety mechanisms and mitigating threats from reaching students on school premises.

Vision

To be the leading provider of smart campus solutions, known for our comprehensive and effective technologies that transform campuses into safe and connected environments.

Real-Time Video

- Integrity and transparency
 - Safety and security
- Innovation and technology

Door Access Control

- Implement perimeter security across all campuses
 - Install video surveillance systems in key areas
- Achieve a 15% improvement in campus safety ratings

Weapon Detection

- Comprehensive range of security technologies
 - AI integration for advanced threat detection
 - Automated layered security response

Panic Buttons

- Establish smart campus solutions in multiple regions
- Develop partnerships with leading educational institutions
 - Double the number of campuses using our solutions

GunShot Detection

- Increase awareness and adoption of smart campus solutions by 20% in the next year
 - Enhance and expand technological integrations
- Strengthen collaborations with technology and education partners

Smart Screens

- Install and test door access control technology
- Launch public Wi-Fi with integrated security features
- Deploy NG911 integrations for enhanced emergency response
