

# License Plate Recognition as a Service

CloudRunner LPR

CloudRunner LPR is a turn-key installation that complies with DOT standards. Solar powered, 5G connected, and cloud hosted we ensure your data is available, accurate, interoperable when you need it.

## Key Features

- Real-time Recognition and Alerting
- Accurate up to 100+ mph
- Multiple Platform Integrations
- Edge- Compute Device
- NCIC, DISL and Searchable Hotlist Database
- 5G Network with Priority and Preemption

## Use Cases

### Law Enforcement

Enhance security and crime prevention efforts by correlating live license plate data and repurposing it into actionable intelligence.

### Toll Collection

Save time and reduce costs on manual collection and focus on improving traffic flow and infrastructure.

### Parking Management

Make parking operations more efficient to customers through automated license plate recognition.

### Fleet Management

Improve the efficiency of your fleet's operations and increase accountability.

## Benefits

- 1 LPR as a Service ensures that your license plate data is preserved for future reference or repurposing.
- 2 Recognized plates make data accessible to a wider audience, including those with security concerns.
- 3 Recognized content is search engine friendly, improving your data's discoverability.
