wi-fiber SMART
infrastructure that works.

Access Control

Integration with Legacy Cameras

Our door access control solution integrates seamlessly with legacy cameras through our cloud-hosted software, providing an efficient and cost-effective security upgrade.

Key Features

- Multi-Factor Authentication (MFA)
- Camera and Multi-Sensor Correlation
- Automated Layered Security
- Remote Access Validation
- Real-Time Alerts and Responses
- Seamless Integration with Existing Systems

Benefits

Automated Security measures that instantly respond to threats

Cost-Effective solution by utilizing existing camera infrastructure

Enhanced access control with multi-factor validation and sensor correlation

Real-time alerts and responses for immediate threat management

Seamless integration with legacy systems for easy deployment

Application Areas

Corporate Offices
Upgrade security in office environments with sensitive information

Healthcare Facilities
Protect patients and staff in hospitals and clinics

Educational Institutions
Enhance safety in schools and universities

Government Buildings
Secure access to sensitive or classified areas
